TO THE PEOPLE OF ILLINOIS

March 15, 2011

One of the functions of the Office of the Comptroller is the establishment of appropriations within the statewide accounting system so that expenditures may be recorded against those appropriations. An appropriation is an amount of money that a state entity is allowed to spend for a specific purpose during a fiscal year. Expenditures are recorded against the appropriation until the total appropriation is depleted. Once the appropriation level has been reached, no more spending can occur from that appropriation line.

Appropriations are established based on budget bills which are passed by the General Assembly and signed into law by the Governor. During the budgeting process various State agencies provide input on items which need clarification to the General Assembly and the Governor's Budget Office. Once this process is completed, my Office compiles all of the appropriations into a report for use by policy makers, state agencies and other interested parties. It is a good source for Illinois taxpayers to determine how their tax dollars are spent, and it is important to note that the State's ability to expend money outside the appropriation process is extremely limited by the Constitution of the State of Illinois.

This is the *Appropriations Report* for fiscal year 2011, which began on July 1, 2010 and will end on June 30, 2011.

Appropriations for fiscal year 2011 total $84.881 billion, an increase of $3.999 billion or 4.9% over fiscal year 2010 appropriations which include all supplemental appropriations for the fiscal year. Fiscal year 2011 is the second fiscal year to include $3.466 billion which has been appropriated to the Governor's Office to be allocated to State agencies for discretionary purposes as determined by that office. These appropriations are reflected in the report as they were originally approved and do not reflect the Governor's allocation. Other notable highlights of the fiscal year 2011 budget include:

- The Department of Transportation has the greatest amount of appropriations totaling $20.863 billion in fiscal year 2011. The department's appropriations represent 24.58% of the total fiscal year 2011 budget.

- The Department of Healthcare and Family Services, the State Board of Education, and the Department of Human Services are the next three largest agencies in terms of appropriations. Those appropriations are $17.831 billion, $11.051 billion, and $5.037 billion respectively.

continued—

- From a functional viewpoint, health and human services represent the single largest appropriated function, totaling $25.176 billion, an increase of 10.98% from fiscal year 2010.

- Transportation and education are the second and third highest appropriated functions. Transportation appropriations total $20.863 billion, 7.85% higher than fiscal year 2010. Appropriations to the State Board of Education increased 0.77% for fiscal year 2011 with the education function totaling $15.506 billion.

- General Funds' appropriations total $25.814 billion for fiscal year 2011, which is a decrease of 1.03% from fiscal year 2010 appropriations.

- General Funds' appropriations account for 30.41% of all appropriations for fiscal year 2011, a decrease from 32.03% in fiscal year 2010. Special State funds, in contrast, represent 22.46% of total appropriations compared to 19.89% in fiscal year 2010. For fiscal year 2011 Bond funds total 20.52% of fiscal year appropriations as compared to 20.94% for fiscal year 2010.

It is my sincere hope that the information provided in this report gives taxpayers and policy makers an accurate and understandable depiction of the priorities set in the fiscal year 2011 budget.

Table IV. Summary of "Final Appropriations for Fiscal Year 2010” 745

Appendix I. Amendatory and Supplemental Appropriations to complete Fiscal Year 2010 769

INTRODUCTION

Appropriations passed by the General Assembly and approved by the Governor for fiscal year 2011, as of July 1, 2010, are compiled in this volume.

To avoid repetition, quotations from the text of appropriation bills omit the uniform enacting clause, “Be it enacted by the People of the State of Illinois, represented in the General Assembly”. Quotations from enabling bills likewise omit preambles and other material not directly related to appropriations.

A numerical index of approved appropriated bills by bill number and Public Act follows this introduction. All appropriations for fiscal year 2011 are presented in the succeeding pages. The presentation includes all appropriations newly available for expenditure as well as reappropriations of unexpended balances of fiscal year 2010 appropriations. Amendatory and supplemental appropriations to complete fiscal year 2010 are similarly indexed on the following pages.

A series of analytical tables follow the numerical index to appropriation bills. All tables provide appropriated and reappropriated amounts. Table I is a summary of fiscal year 2011 appropriations by fund group and fund; Table II summarizes appropriations by category and major fund groups; while Table III provides a summary by agency, category and fund.

Table IV presents a summary by fund of all fiscal year 2010 appropriations added or amended by the bills presented in Appendix I of this publication. The total of “Final” appropriations available for fiscal year 2010 is reflected in this table.

The information provided in the “Illinois Appropriations” book for fiscal year 2011, to the best of our knowledge, reflects the appropriation accounts and amounts established in the Comptrollers Statewide Accounting Management System (SAMS) as of July 1, 2010.
