## **USER RESPONSIBILITIES**

The types of responsibilities a person has regarding the Comptroller's Statewide Accounting Management System (SAMS) depend upon the position within an agency and the size of the agency. In the case of larger agencies, the responsibilities may be clearly segregated as to agency head, chief accounting officer, accounting supervisors, accountants, etc. In the case of smaller agencies, such a delegation of responsibilities may not be feasible due to the limited number of persons in the agency.

[Agencies are responsible for monitoring their employees' SAMS user access. To assist with this, agencies can request a report from the Comptroller's Office or schedule routine reports listing staff with active logins and access permissions.](#)

The following paragraphs briefly describe the responsibilities users of the SAMS system may want to assume. These responsibilities are not intended to be all-inclusive, but are guidelines to follow.

### Agency Heads

Agency heads have the overall responsibility to see that the fiscal management programs and procedures prescribed by the Comptroller are carried out. Depending on the size of the agency, the agency head may have a wide range of responsibilities. These could range from being familiar with detail processing procedures to being in a review position where he would evaluate operating results with his management staff.

### Agency Accountants

Agency accountants may have the operating responsibility of supervising and training the clerical staff who perform the actual document processing. For effective training and supervision, agency accountants should have a thorough knowledge of the various invoice-voucher, receipt deposit and other forms as well as reference material, such as the charts of accounts. The review and resolution of SAMS-generated agency reconciliation reports may also be the responsibility of the chief accountant of the agency.

### Agency Clerical Personnel

Agency clerical personnel usually work under the direct supervision of agency accountants who determine their specific duties and responsibilities in preparing SAMS input documents. Clerical employees will want to be thoroughly knowledgeable in operating procedures necessary for the proper performance of their duties.

\* Other changes such as a change in the contract term, description, vendor name or address, or method of compensation must be coded as a "20." A contract amendment or modification may require a two-party signed agreement.

Increases and decreases to fixed amount obligations must be accompanied by a two-party signed contract amendment. The COD description must describe the reason for the increase/decrease, and identify the applicable portion of the contract that allows it.

Additional signature approval for an amendment increasing the contract value to or by \$250,000 or more will be required as prescribed within 30 ILCS 105/9.02 (a) (1).

All contracts/grants must have a unique number and that unique number cannot be used again in subsequent fiscal years. If a contract/obligation number is reused in any future year, it will be rejected by SAMS. However, agencies must use the same number for the entire life of a multiple year contract/grant.

[EXCEPTION: When a vendor change occurs that impacts the FEIN associated with the obligation, a new obligation is created with a new number assigned.](#)

(5) Transaction Date (optional)

Enter the date (month-day-year format) the obligation document is prepared for transmittal; i.e., if the preparation date is July 1, 2001, 07/01/01 is entered.

**INVENTORY ANALYSIS (SCO-577)**

**PURPOSE**

The purpose of the Inventory Analysis (Exhibit 27.20.77-A) is to determine the value of the agency's total inventory at fiscal year-end.

When applicable, this form must be completed annually and sent to the Comptroller's Office as part of the year-end reporting package. Two copies should be retained by the agency: one to provide an internal record and one for the Auditor General or his representative.

**GENERAL**

The Inventory Analysis Form should be completed for all governmental funds (shared, nonshared and locally-held fund GAAP packages) only when inventory exceeds \$2 million.

The major categories to be used for inventory include:

- Equipment parts and accessories including automobile, truck, airplane, and equipment parts.
- Food supplies including inventories at commissaries and food centers, and food for free distribution.
- Gasoline, oil and lubricants.
- Paper and printing supplies, excluding normal office supplies.
- Road salt and sand.
- Wearing apparel, including clothing for inmates and residents.
- "Other", which includes material inventories not noted above (e.g., tools and chemicals). Identify all inventory types included in "Other."

All amounts on this form must be rounded to the nearest thousand. Where a line or column does not apply, leave it blank. This form should be completed on the Comptroller's WEDGE system. The system will automatically calculate totals, as well as, populate the required journal entries.

Proprietary funds, fiduciary funds and component units should report the inventory balances on the Statement of Net Position in the GAAP package, however are not required to complete this form.

**INSTRUCTIONS**

In accordance with accounting principles applicable to inventories, agencies must price inventory at the lower of cost or market. To determine the lower of cost or market, the following steps must be completed:

- Step 1: Determine the valuation method for each type of inventory. The methods required to be used for all State funds are either the FIFO (first-in, first-out) method or the average cost method. The FIFO method allocates costs to inventory on the assumption that goods are used in the order in which they are purchased. Under this method, the inventory is a build-up or layering of the most recent purchase costs. The Average Cost Method values inventories based on the average cost of the item purchased during the year. The Average Cost Method should only be used when it approximates the FIFO method.
- Step 2: Determine the cost of the inventory based on the valuation methods described above. Cost is defined as the price paid or the consideration given to acquire the inventory item. Included in the cost are all direct and indirect costs incurred during transportation.
- Step 3: Determine the market value of the inventory. Market value is defined as the item's current replacement cost by either purchase or reproduction. Exceptions to this definition are:
- The market value should not exceed the net realizable value (ceiling). The net realizable value is the estimated selling price of the inventory in the ordinary course of business, less reasonably predictable costs of completion and disposal. Example: obsolete and damaged material which, if stated at replacement cost, would result in an overstatement of inventory.
  - The market value should not be less than the net realizable value reduced by an allowance for an approximately normal profit margin. Example: selling price less a normal profit margin is more than the replacement cost.
- Step 4: Determine which is lower, cost or market, for each type of item. This amount will be recorded on the agency's trial balance to be submitted to the Comptroller's Office.

**STANDARD JOURNAL ENTRIES**

An adjusting entry is needed to record inventory in excess of \$2 million as an asset and as a reduction to the expenditures account charged with the original inventory purchase. In addition, a
